Austin Henley and Andrew Begel

Today

- Review of P2 Dev Specs
- How should we (all) evaluate homework done by LLM+you
- Techniques for making an LLM obey your commands

Review of P2 Dev Specs

- Evaluation criteria that we used
- Verify your own dev spec and self-grade the quality of the spec
 - Are the required sections there?
 - Do they provide the information needed?
 - Look for inconsistencies
 - Does it actually make sense?
- You can resubmit your corrected P2

How should we evaluate you+LLM?

- We looked at your chat logs to see how much you interrogated the results of the LLM
- We checked your dev spec for consistency

Techniques for making an LLM obey

- “Steering”
- Review the #mobbing channel with all our lessons learned.
- For this list of requests, let’s write multi-shot prompts together that make the LLM do the right thing.
